

GARASJER 2010

*Garasjemodeller
fra
Buen A.S.*

Garasjer fra BUEN A.S.

Vi produserer hytter, hus, garasjer og andre småhus som er annerledes og har en form og stil som harmonerer med norsk natur.

I løpet av 40 år har vi funnet vårt særpreg ved å kombinere ennå levende håndverkstradisjoner og ferdigheter fra bygde-Norge med moderne teknologi og byggekunst. Her deler datamaskiner og treskjærere jobben, bokstavelig talt.

Konstruksjoner og dimensjonering er bunnsolide, og det brukes kun norskproduserte materialer og byggevarer. All treskjæring er håndarbeid.

Garasjene leveres i velutviklet precut-system, og det lages lettfattelige byggebeskrivelser og arbeidstegninger, slik at det er mulig å bidra med stor grad av egeninnsats i oppføringen.

I denne brosjyren finnes en del standardmodeller. Disse leveres sjelden eksakt slik de er i brosjyren, men tilpasses byggeplass, behov og ambisjonsnivå hos den enkelte kunde.

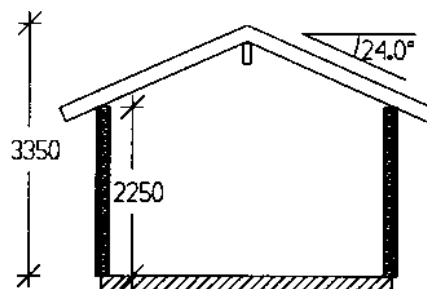

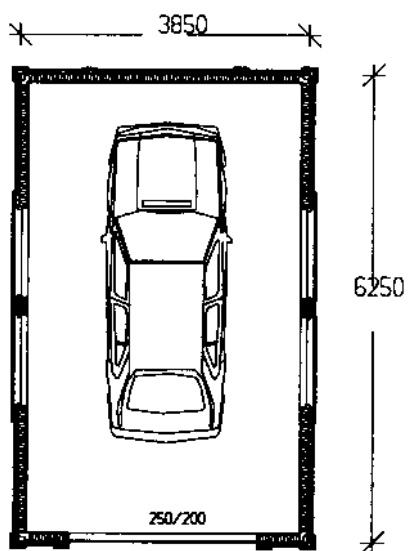

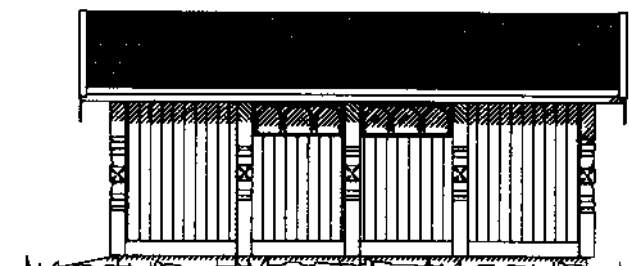

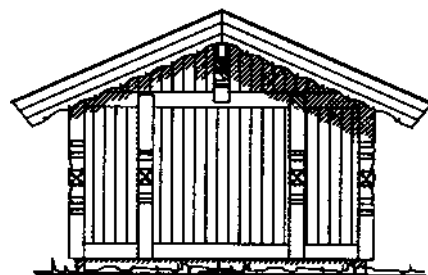

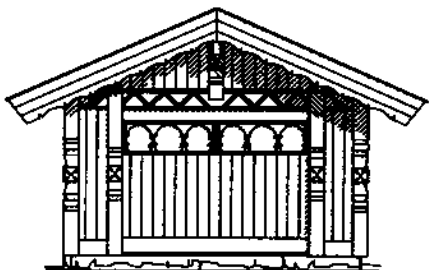

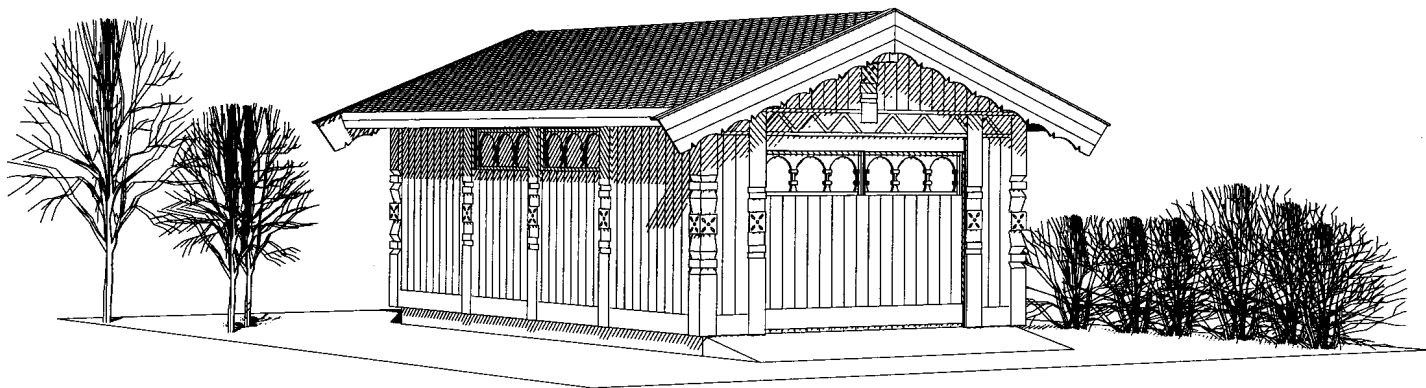

I mange tilfeller starter vi med blanke ark og tegner helt nye modeller i samarbeid med kunde.

Ved hjelp av et avansert dataprogram gjøres dette på kort tid, og medfører ikke store ekstrakostnader utover det som følger av økt materialforbruk.
